

DAT Carrier Select

Find targeted capacity to manage costs on priority lanes

One of the offerings in the DAT iQ Network Analytics solution suite designed to help shippers analyze network costs against benchmarks and identify alternative carriers that match capacity, service level, and budget requirements.

Manage Costs More Efficiently

- Quickly uncover lanes with the greatest cost savings potential relative to benchmark costs.
- Fine-tune your segmentation analysis with flexible filter options.
- Save hours normally spent reviewing historical reports on network costs.

Find the Right Carriers

- Identify new carriers that fit with your network to add targeted capacity.
- See matches based on the recency and volume of carriers' DAT load board activity.
- View cost management opportunities by lane and carrier, and hone in on carrier details such as size, contact info, SmartWay Certification, and more.
- Streamline lengthy new carrier sales and onboarding cycles with targeted outreach.

Ask DATiQ: What lanes should I add new carrier capacity to find which carriers are the best fit?

Dashboard Filters: Estimate set to: Time Reversed, Made, Date Range, Filter 1, Filter 2, Filter 3

Top 10 Lanes by Market Delta
